**DETAILED ACTION**

The amendment filed January 29, 2009 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no clear antecedent basis for "the at least one pivotable arm" as recited in claim 8.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6, 9, 11-13, 16, 21-23, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lindstrom (2003/0189348) in view of Boos et al. (5,163,726).

Lindstrom shows an embodiment of a primary hoisting frame in Figure 4 having hoisting cables attachable to the upper side thereof and twist-lock means (3) on an underside of adjustable frame portions (6,7). These portions (6,7) of the primary

hoisting frame are adjustable between extended and retracted positions and are capable of picking up certain secondary frames of various dimensions so long as the secondary frames can accommodate twist locks (3).

The patent to Boos et al. shows a primary frame (10) attachable to a secondary frame (20) through twist locks (14A-D) so that over-height cargo supported on a pallet can be lifted.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use Lindstrom's adjustable primary frame to pick up an over-height frame similar to that shown (20) in the Boos et al. patent for handling over height cargo supported on a pallet or the like. The twist locks (3) are the means for picking up the secondary frame (20) just as Boos et al. uses twist locks (14A-D) to pick up the frame.

It is pointed out that the above claims are directed to a *subcombination* of a hoisting frame that is useable with a secondary hoisting frame and a container. Applicant's arguments regarding the dimensions of the claimed hoisting frame relative to a secondary hoisting frame and/or a container are not persuasive because the proposed modified Lindstrom hoisting frame assembly, as set forth in the above rejection, is at least deemed to be *capable* of picking up secondary hoisting frames and containers of certain sizes.

***Allowable Subject Matter***

5. Claims 29-34 are allowed.

6. Claims 7, 10, 14, 15, 17-20, and 24-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
